Developing a Climate & Carbon “Toolbox”

A collaboration between ABCFP, UNBC and PICS

We need your input

What questions come to your mind when you...

...think about **carbon release** – what do you need to support you through decisions about how to reduce these emissions?

...think about **carbon maintenance and sequestration** – which parts of your activities might lead to carbon sequestration improvements or maintaining carbon in a sequestered form?

...think about **climate adaptations** – what information do you need as a professional to maintain resilience in the face of climate changes, for example, drought, warming, etc.

Thank you for your feedback!
